Advanced Planning: Entry survey

- Do you think a classical planning planning approach can be used for solving scheduling problems?
  Answer: Yes, it can suggest a sequence of events.

- What would be the advantage of making hierarchical plans?
  Answer: Would allow making abstract versus detailed plans.

- Why isn't classical planning schema adequate for resource planning?
  Answer: If resources are treated like regular objects, there is too much unnecessary computation.

- What is the advantage gained in abstract plans by having *surely-reachable* versus *potentially-reachable* states?
  Answer: Allows finding possible "draft" solutions to solve difficult problems efficiently.
